(54) METHOD AND DEVICE FOR STORING INFORMATION FOR PAGER TERMINAL EQUIPMENT

(57)Abstract:

PURPOSE: To allow the pager possessor subscriber himself to access an information center and to extract required information and to store the information to the pager terminal equipment itself for reference at any time.
CONSTITUTION: When a controller 6 detects a call received by an information center 9 through telephone exchange stations 3, 4 by a subscriber A using a telephone set 1, a voice reply device 8 receiving the incoming call applies voice guidance to data to be entered from the subscriber A using the telephone set 1 through the telephone exchange stations 4, 3. The data entered by using the telephone set 1 by the subscriber A according to the voice guidance are reported to the controller 6 via the telephone exchange stations 3, 4, the controller 6 makes an automatic call to a telephone set 5, after a communication path is formed between the telephone set 5 and the pager terminal 2 through the telephone exchange station 4, the controller 6 transfers the desired information requested by the subscriber A from an information storage device 7 to the pager terminal 2 through the telephone exchange station 4. Then the pager terminal 2 stores the information transferred from the information center 9 and displays it.

LEGAL STATUS

[Date of request for examination] 22.09.1994

[Date of sending the examiner's decision of rejection] 22.04.1997

[Kind of final disposal of application other than the examiner's decision of rejection or application converted registration]

[Date of final disposal for application]

[Patent number]

[Date of registration]

[Number of appeal against examiner's decision of
rejection]

[Date of requesting appeal against examiner's
decision of rejection]

[Date of extinction of right]
